Prioritization & Execution: RICE, MoSCoW, Agile/Scrum, Sprint Planning, Backlog Management, Requirement Gathering, Process Improvement

Product Analytics: Funnel Analysis, Activation, Conversion, Engagement, Retention, Product Metrics, Root Cause Analysis

Tools & Professional Skills: Jira, Figma, SQL, Excel, Google Sheets, PowerPoint, Stakeholder Management, Communication, Problem-Solving

Professional Experience

RX Placement – Healthcare Recruitment Consultancy *September 2025 – Present*

HR Recruiter & Telecalling Executive *India*

- Gathered candidate requirements, understood career preferences, and matched profiles with suitable opportunities based on user needs and hiring requirements.
- Coordinated with candidates and hiring stakeholders, resolve queries, manage follow-ups, and improved communication across recruitment workflows.
- Maintained recruitment trackers, prioritized candidate pipelines, and monitored progress to support timely decisions and efficient workflow management.

Product Management Training

CareerVeda *April – October 2026*

PG Program in Product Management

- *Practiced product discovery, user research, personas, journey mapping, competitor analysis, and problem definition.*
- *Developed practice PRDs, user stories, acceptance criteria, and roadmaps; applied RICE, MoSCoW, and Agile/Scrum.*
- *Studied product metrics, funnel analysis, prioritization, and root cause analysis through product case studies and teardowns.*

Product Analysis and Case Studies

Swiggy – Product Teardown *Product Analysis*

- *Analyzed food discovery, restaurant ranking, checkout, delivery tracking, and retention loops to understand the end-to-end ordering experience.*
- *Identified potential friction points across the ordering funnel and explored opportunities to improve discoverability, checkout completion, and delivery transparency.*
- *Evaluated potential improvements using user-centric problem analysis, prioritization, and funnel optimization.*

WhatsApp – Product Teardown *Product Analysis*

- *Reviewed onboarding, messaging, group interactions, and engagement loops to understand how the product supports communication and repeat usage.*
- *Mapped activation, engagement, retention, and growth opportunities and explored improvements to the initial user experience and ongoing interactions.*

Google Pay – Product Teardown *Product Analysis*

- *Evaluated payment flows, trust signals, transaction success, and recovery journeys from a user experience and product reliability perspective.*
- *Identified potential usability and conversion improvements involving payment confirmation, transaction failures, error communication, and recovery steps.*
- *Examined how transaction success, user trust, and friction reduction can influence customer satisfaction and continued usage.*

Improving Checkout Conversion for an E-commerce App *Product Case Study*

- *Examined checkout friction and potential barriers affecting purchase completion across the e-commerce customer journey.*
- *Applied problem analysis, funnel thinking, and prioritization to evaluate improvements to the checkout experience.*
- *Explored solutions such as reducing unnecessary checkout steps, improving pricing transparency, simplifying form completion, and clarifying payment errors.*
- *Identified checkout abandonment, conversion rate, and successful purchase completion as metrics for evaluating proposed improvements.*

The above projects are product analysis and learning case studies. Proposed solutions are not presented as implemented features or verified business results.

Education

Seth GL Bihani SD PG College *2024 – 2027*

Bachelor of Business Administration (BBA) *Expected Graduation: 2027*
